MANAGING PETITONS
MADE EASY

OUR PARTNERS:

City of Townsville

BRISBANE CITY

An innovator in next generation engagement and customised site design, Internet Thinking has developed e-Petition software to help local governments and organisations provide a facility for people to submit petitions electronically.

Do you have the people or budget to manage an average of 150 new petitions, and 28,400 signatures per year? (BCC 2019)

This very affordable solution is designed with usability, cost-savings and security in mind, offering:

- a step-by-step way to list, view, sign and create online petitions
- a simple and accessible interface to ensure that technology is no barrier for any individual or group
- two step registration and authentication process for signatories
- reCaptcha to guard against bot submissions
- workflows to ensure submitted petitions can be easily reviewed and administered, while set trigger thresholds and alerts to monitor expiry dates and result notifications to principal petitioner and all signatories
- administrator interface to manage decisions, add comments, generate reports and publish results

OUR e-PETITION SOFTWARE CAN:

1. **Help increase levels of public trust** - by making it easier for the community to express their views and compliance for your petition requirements
2. **Reduce overhead costs** - through effective system controls, review and approval processes
3. **Engage Decision Makers** - automating the petition process with thresholds to trigger further discussion or awareness with key stakeholders
4. **Be Responsive** - remove manual collations to quickly analyse, report and respond
5. **Create Awareness** - ensure petitioners know that their views have been listened to
6. **Provide Security & Data Protection** - built on industry best practice
